Sharawy Mohamed

Junior .NET Backend Engineer •
Cairo, Egypt • +20 104 496 4191 • sharawymohamed.a@gmail.com
LinkedIn • GitHub • LeetCode • Codeforces (1300+)

Professional Summary

Results-driven Junior .NET Backend Developer specializing in scalable RESTful APIs, Microservices, and high-performance backends with C# and .NET 8/10. Strong foundation in Clean Architecture, CQRS, Event-Driven patterns, and database optimization, backed by 1300+ competitive programming problems. Available to start full-time after completing military service (expected mid-November 2026).

Technical Skills

- **Languages:** C#, C++, SQL, TypeScript, JavaScript
- **Backend:** .NET 8/10, ASP.NET Core Web API, EF Core, Dapper, MediatR, Mapster, Fluent Validation, LINQ, SignalR, gRPC, Microservices, REST APIs
- **Databases:** SQL Server, PostgreSQL, MongoDB, Redis
- **DevOps & Testing:** Docker, Docker Compose, Git, GitHub, Postman, xUnit, Unit Testing; Familiar with CI/CD pipelines and Azure
- **Architecture:** System Design, OOP, SOLID, Design Patterns, Clean Architecture, CQRS, Event-Driven Architecture, Data Structures & Algorithms

Professional Experience

Back-End Developer Nov 2023 – Mar 2024
PSolve Cairo, Egypt

- Engineered high-availability microservices with .NET Core & C#, achieving 30% faster API response times and 99.8% uptime.
- Wrote 500+ unit tests (xUnit), raising coverage from 60% to 80% and cutting production defects by 30%.
- Optimized SQL Server queries, indexing, and EF Core plans for significant throughput gains on high-traffic endpoints.

Selected Projects

Microservices E-Commerce Platform GitHub

- Designed a distributed e-commerce backend in .NET 10 using Clean Architecture, CQRS (MediatR), and Docker Compose.
- Decoupled services across MongoDB (Catalog), Redis (Basket), and PostgreSQL with Dapper for high-throughput persistence.
- Implemented robust validation, DTO mapping via Mapster, and distributed caching to ensure fault tolerance under heavy load.

PharmAssist – AI-Powered Pharmacy System (Graduation Project) Sohag University

- Architected a scalable ASP.NET Core Web API following Clean Architecture backed by EF Core and SQL Server.
- Developed a fuzzy drug-matching search engine using advanced string distance algorithms, improving lookup accuracy by 40%.
- Integrated computer vision modules (YOLOv11 and CNN) for automated prescription parsing and secure JWT role-based access.

Talabat E-Commerce API Clone GitHub

- Built a robust .NET 8 Web API simulating enterprise-scale food delivery transactions integrated with Stripe payment gateways.
- Accelerated read performance 5x by caching frequent product catalogs and cart states in Redis.

Airbnb Clone (Full Backend) GitHub

- Applied the Specification Pattern to decouple complex, multi-criteria property filtering logic from repository layers.
- Integrated Redis caching to minimize database query overhead, accelerating listing searches by 70%.

Education & Certifications

B.Sc. in Computer Science (GPA: 3.36 / 4.0 – Very Good) 2021 – 2025
Sohag University Egypt

- Relevant Coursework: Data Structures, Algorithms, Software Engineering, Database Systems, Operating Systems.

Back-End (.NET Core) Diploma 2023 – 2024
Route Academy

- Mastered ASP.NET Core Web API, MVC, EF Core, SQL Server & Clean Architecture through enterprise projects.

Achievements & Activities

- **Competitive Programming:** ECPC 2022 qualifier; 1300+ problems solved on Codeforces (Pupil) & LeetCode.
- **Training & Community:** Conducted training at iSchool; contributed to PRD planning at LABS by Bincom.
